

Public Health Reports

Treasury Department, United States Marine-Hospital Service. Published in accordance with act of Congress approved February 15, 1893.

VOL. XII.

WASHINGTON, D. C., MAY 28, 1897.

No. 22.

UNITED STATES.

[Reports to the Supervising Surgeon-General United States Marine-Hospital Service.]

Smallpox in Mobile.

MOBILE, ALA., May 22, 1897.

SIR: I have the honor to state that on the 21st instant Celia Johnson, colored female, aged 25, whose residence is at Elmira and Lawrencee streets, applied at the city dispensary for treatment for a sore throat. Dr. Campbell discovered smallpox and sent for Dr. Abrahams, the city health officer, who confirmed the diagnosis and at once sent the woman to the pesthouse.

There are no cases or reasons for suspicion in or near the house where the woman lived, and the origin is unknown. It is fair to suppose that the disease was imported by a transient visitor.

The two cases reported March 28 and April 17 were discharged from the pesthouse on May 11.

A case was discovered in a white woman in Birmingham two weeks ago, recently from Memphis and perhaps due to infection left by De Forest, the March 19 case. Careful inquiry fails to connect Mobile with the De Forest case. A report is received to-day of a suspicious case near Montgomery which the state health officer will investigate.

I am, very respectfully, your obedient servant,

R. D. MURRAY,
Surgeon, U. S. M. H. S.

Smallpox in Pensacola.

PENSACOLA, FLA., May 24, 1897.

SIR: I have the honor to inform you that a case of smallpox was reported at the office of the board of health on the 20th instant. The victim is a negro, by the name of Joe Carter, who has been employed on the work train of L. and N. R. R. He was brought here from Cottondale, Fla., on the P. and A. division of the L. and N. about a hundred and thirty miles from this city. He was immediately sent to the pesthouse.

Respectfully yours,

J. WHITING HARGIS,
Acting Assistant Surgeon, U. S. M. H. S.

*Smallpox in the United States as reported to the Supervising Surgeon-General United States Marine-Hospital Service, December 29, 1896, to May 28, 1897.**

Current quarantine measures.

[Translated in this Bureau from the "Veröffentlichungen des Kaiserlichen Gesundheitsamtes," Berlin, May 5, 1897.]

BELGIUM.—By royal order of April 5, the sanitary police regulations against the importation of plague have been amended as follows, in accordance with the recommendations of the conference of Venice, held in March, 1897:

Article 1. Entry and transportation of the following-named articles from countries or localities infected with plague are forbidden, by land routes as well as water ways.

(a) Body linen, old or used articles of clothing, and bedding that has been used, so far as these articles may be considered as merchandise.

(b) Rags. Bagging that has been in use, old carpets and embroideries that have been in use.

(c) Raw hides and green skins.

(d) Fresh animal refuse, claws, hoofs, hair, raw silk, and wool.

(e) Human hair.

This order, so far as it relates to raw wool, green skins, raw hides, and certain sorts of rags and carpets, may be suspended by ministerial order and repealed by special provisions relative to packing, disinfection, etc.

Article 2. The transportation of the susceptible articles named in article 1 shall take place under supervision of the customs officer if these articles have been so packed as to escape infection.

Article 3. Entry and transportation of articles named in article 1, but not coming from plague-infected countries or localities, may take place by permission of the customs officers under certification relative to their place of origin.

Article 4. Entry and transportation of said articles where they have been at infected ports en route, may take place, provided the authorities at the said ports can certify that they have not come in contact with polluting matter.

Article 4. Articles named in article 1 shall not be denied entry and transportation if the customs officers can certify that they left the infected port prior to the outbreak of the disease.

Article 5. The minister of agriculture and public works shall publicly specify the countries and districts against which these regulations are in force and shall fix the duration of their application.

Article 6. The measures of medical inspection, disinfection, and isolation prescribed for use in ports shall be in conformity with the recommendations of the Venice conference.

Article 7. The said minister shall also prescribe the measures for disinfection of baggage in conformity with the recommendations of the conference.

Article 8. The royal order of January 8 and all the measures of the sanitary commission of the Scheld, which are not in conformity with the recommendations of the conference, are hereby declared out of force.

PERSIA.—According to advices of March 17 the protective measures ordered for the South Persian littoral are extended to include bedding, clothing in use, mattresses, hides, rags, and cotton waste among infectious articles.

BRAZIL.*Sanitary reports from Rio.***RIO DE JANEIRO, BRAZIL, April 19, 1897.**

SIR: I have the honor to transmit report for the week ended April 17, 1897:

There were 15 deaths from *acesso pernicioso*, an increase of 1; 12 from yellow fever, an increase of 11; 11 from beriberi, a decrease of 5; 8 from enteric fever, an increase of 4; 1 from measles, none in the foregoing week; 40 from tuberculosis, a decrease of 9; none from whooping cough, none in the foregoing week, and 298 from all causes, a decrease of 27. The health of the town and port continues excellent. Of the

May 28, 1897

cases of beriberi two were in private houses, but evidently taken from the hospitals. The yellow fever cases may be due to the unseasonable high temperature.

Since last report the following-named ships have been inspected or received bills of health from this office: April 12, steamship *Catania*, German, for New York, and steamship *Parthia*, German, for New York, from Santos. April 14, steamship *Eastern Prince*, British, for New York. April 19, steamship *Drummond*, British, Capt. D. Mills, for Ship Island, Miss., or Pensacola, Fla., and steamship *Handel*, British, for New York.

Respectfully yours,

R. CLEARY, M. D.,
Sanitary Inspector, U. S. M. H. S.

RIO DE JANEIRO, April 26, 1897.

SIR: I have the honor to transmit report for the week ended April 24, 1897:

There were 9 deaths from *acesso pernicioso*, a decrease of 4; 7 from yellow fever, a decrease of 5; 7 from beriberi, a decrease of 4; 8 from enteric fever and 1 from measles, the same as in the foregoing week; 38 from tuberculosis, a decrease of 2, and 308 from all causes, an increase of 10.

By telegraph we have the news that yellow fever has appeared in Sorocaba, and Guaritingatá in São Paulo.

The health of this town and port continues good.

Since last report the following-named ships have been inspected, or received bills of health from this office: April 19, steamship *California*, French, for New Orleans, from Santos. April 20, bark *Assyria*, Norwegian, for Mobile, Ala. April 22, ship *Girpen*, Swedish, for Sabine Pass, La.; bark *Innervick*, British, for Sapelo Sound, Ga. April 23, bark *Cornelia*, Dutch, for Tybee Roads, Ga., and barkentine *Frances*, American, for Baltimore, Md. April 24, steamship *Grecian Prince*, British, for Barbados, West Indies. April 26, steamship *Bellarden*, British, for New York, N. Y.

Respectfully yours,

R. CLEARY, M. D.,
Sanitary Inspector, U. S. M. H. S.

CUBA.

Smallpox and yellow fever in Cuban seaports.

May 22: The United States sanitary inspector at Habana reports that during the week ended May 20 there were in that city 16 deaths from yellow fever, with 60 new cases, and 50 new cases of smallpox, with 7 deaths.

May 18: The United States consul at Cardenas reports that during the week ended May 15 there were in that city 5 new cases and no deaths from yellow fever, and 10 cases and 5 deaths from smallpox.

May 14: The United States consul at Matanzas reports that during the week ended May 12 there were in that city 1 death from smallpox and 2 deaths from yellow fever.

May 17: The United States consul at Sagua la Grande reports that during the week ended May 15 there were in that city 24 new cases and no deaths reported from yellow fever, and 14 cases and 1 death from smallpox.

Sanitary report from Habana.

HABANA, CUBA, May 22, 1897.

Sir: I have the honor to inform you that the mortality from smallpox continues to diminish, and has now reached just about the proportions that it had one year ago, before the severe epidemic of it commenced. Yellow fever is still confined almost entirely to the Spanish troops in military hospitals with about the same mortality as last week, the cool dry weather which has prevailed here for over six weeks still continuing.

Mortuary report.—During the week ended May 20 there were 202 deaths from all diseases in this city, 16 of which were caused by yellow fever, with approximately 60 new cases; 7 were caused by smallpox, with 50 new cases, approximately; 11 were caused by enteric fever, 5 by so-called pernicious fever, 4 by paludal fever, 8 by dysentery, 18 by enteritis, 1 by diphtheria, 5 by pneumonia, and 29 by tuberculosis. Fifteen of the deaths from yellow fever during the week were among Spanish soldiers in the military hospitals, while the remaining one was a civilian in the city. All of the 7 deaths from smallpox were among civilians.

Very respectfully,

D. M. BURGESS,
Sanitary Inspector, U. S. M. H. S.

INDIA.

Remarks on the official summary of deaths and births in the city of Bombay for the week ended April 20, 1897.

BOMBAY, April 22, 1897.

SIR: The population continues to return at the rate of 1,500 to 2,000 per day. All persons entering the city are rigidly inspected by medical officers. There is a gratifying gradual improvement from day to day in the number of cases of plague reported and in the total mortality in the city. The health officer still continues the absurdity of calculating the annual rate of mortality per 1,000 on the basis of census population of 1891, and thus makes it 51.69 when it should be about double that figure.

Population according to census of 1891.....	821,764
Present population, for the purpose of this report, estimated one-half the above..	410,882
Total number of deaths reported for the week.....	836
Total number of deaths for corresponding week last year.....	687
Mean of corresponding week previous five years	614
Allowing that one-half the population has left the city, the proportionate number of deaths based on the mean of previous five years would be.....	307
Number of deaths last week that may be attributed to plague.....	529
Average per day from plague.....	76
Number of deaths from plague officially reported for week.....	310
<hr/>	
Average per day	44
Probable average number of deaths per day from plague reported as having died of other diseases.....	32
<hr/>	
	76

Officially reported death rate for the last week per 1,000 (estimated on a population of 821,764).....	51.69
Same for corresponding week last year.....	41.38
Mean for corresponding week previous five years.....	37.01
Number of births reported last week.....	81
Number of births for corresponding week last year.....	275
Mean number for corresponding week previous five years	261

S. COMFORT,
United States Consul.

Remarks on the official summary of deaths and births in the city of Bombay for the week ended April 27, 1897.

BOMBAY, April 29, 1897.

SIR: The figures this week show a continued improvement over those of the previous week. There is a reduction of death rate per 1,000 per annum based on the estimate that one-half the population is present in the city, of from 103.38 for the week ended April 20, to 81.24 for the week under report.

Population according to census of 1891.....	821,764
Present population, for the purpose of this report, estimated one-half the above.....	410,882
Total number of deaths reported for the week.....	671
Total number of deaths for corresponding week last year.....	623
Mean number of deaths corresponding weeks, previous five years.....	625
Allowing that one-half the population has left the city, the proportionate number of deaths based on the mean of previous five years would be.....	313
Number of deaths last week that may be attributed to plague.....	358
Average per day from plague.....	51
Number of deaths from plague officially reported for week.....	195
<hr/>	
Average per day	28
Probable average number of deaths per day from plague reported as having died of other diseases.....	23
<hr/>	
Officially reported death rate for the last week per 1,000 (estimated on a population of 821,764).....	51
Same for corresponding week last year	40.62
Mean number for corresponding week previous five years.....	37.77
The actual death rate per 1,000 per annum for last week was about double the rate reported, or say.....	37.84
Number of births reported last week.....	81.24
Number for corresponding week last year.....	117
Mean number for corresponding week previous five years	285

S. COMFORT,
United States Consul.

RUSSIA.

Measures to exclude the Indian plague from Russia.

ST. PETERSBURG, February 15, 1897.

The Trade and Manufactures Gazette of St. Petersburg publishes the new measures, as officially announced by the sanitary commission, to prevent the introduction of the plague existing in India into Russia.

At the meetings held by the sanitary commission on the 5th and 9th of February, the measures and regulations adopted and confirmed in

1893 and 1894 against bringing the plague through land or sea frontiers into the Russian Empire were approved and the following measures added :

1. To send an expedition of medical men to India to investigate the causes and effects of the plague, its first appearance, and increase.
2. To prohibit for this year the pilgrimages of Russian Mussulmans to Mecca or to the other places where the Shiites are wont to resort for devotional purposes; to forbid, also, the Russian Christians visiting the holy places of the East.
3. To prepare and have ready a sufficient quantity of Dr. Yersin's antiplague whey.
4. To send to localities offering unusual facilities for the introduction of the plague special delegates of the commission, who shall have at their disposal a staff of doctors, officers, and civil servants, for the purpose of aiding the local authorities in the execution of the measures recommended by the commission.
5. To publish in the Government Messenger all reliable news regarding the course of the plague epidemic and all information relating to any further action taken or measures adopted by the commission.

The same paper reports that in accordance with the above regulations the sanitary commission received a communication to the effect that the Russian consul-general at Khorassan had telegraphed the governor of Transcaspian Territory that several Indians, who had come to Afghanistan, died in Kandahar last December of bubonic plague. Governor-General Kuropatkin, believing this report probable, at once took steps for the formation of a military cordon on the Afghan frontier, and ordered that travelers and merchandise should only be admitted through Takhtabazar, where a medical observation station had been established. The governor-general of Turkestan, on account of this report, ordered the complete closing of the Bokhara-Afghan frontier.

Information was received later that the Persian Government had closed its frontier toward Afghanistan and that the Afghan Government has suspended all traffic to and from India, that guardhouses have been placed at certain points on the roads to Pashawera and Kwetta, that no cases of plague have occurred in other places in Afghanistan than at Kandahar, and that no increase of mortality has been noticed.

So far the Russian Minister of Finance has granted a credit of 100,000 rubles to defray the cost of the sanitary precautions to be taken to prevent the introduction of the plague into the Russian Empire.

JOHN KAREL,
United States Consul-General.

Statistical reports.

AFRICA—*Mozambique*.—Month of February, 1897. Estimated population, 10,000. Total deaths, 9.

AUSTRIA-HUNGARY—*Budapest*.—Month of January, 1897. Estimated population, 640,000. Total deaths, 1,118, including diphtheria, 2; measles, 4, and typhus fever, 1.

CANADA—*Ontario—Hamilton*.—Month of April, 1897. Estimated population, 50,000. Total deaths, 63, including phthisis pulmonalis, 5.

FRANCE—Nantes.—Month of April, 1897. Estimated population, 125,757. Total deaths, 221, including enteric fever, 1, and whooping cough, 2.

GREAT BRITAIN—England and Wales.—The deaths registered in 33 great towns of England and Wales during the week ended May 8 correspond to an annual rate of 17.0 a thousand of the aggregate population, which is estimated at 10,860,971. The highest rate was recorded in Preston, viz, 30.4, and the lowest in Cardiff, viz, 12.0 a thousand.

London.—One thousand three hundred and twenty-three deaths were registered during the week, including measles, 20; scarlet fever, 10; diphtheria, 26; whooping cough, 35; enteric fever 1, and diarrhea and dysentery, 15. The deaths from all causes correspond to an annual rate of 15.5 a thousand. In greater London 1,706 deaths were registered, corresponding to an annual rate of 14.1 a thousand of the population. In the "outer ring" the deaths included 2 from diphtheria; 6 from measles; 3 from scarlet fever, and 13 from whooping cough.

Scotland.—The deaths registered in 8 principal towns during the week ended May 1 correspond to an annual rate of 22.0 a thousand of the population, which is estimated at 1,518,347. The lowest mortality was recorded in Dundee, viz, 15.9, and the highest in Edinburgh, viz, 30.1 a thousand. The aggregate number of deaths registered from all causes was 655, including measles, 52; scarlet fever, 3; diphtheria, 6, and whooping cough, 45.

INDIA—Singapore.—Month of March, 1897. Estimated population, 56,000. Total deaths, 700, including beriberi, 116; phthisis pulmonalis, 68, and smallpox, 1.
